Dear Josh,

Your note of query about a 6 April 1963 conference on artificial intelligence reveals how patchy Center records are.

The Calendar of Events has no mention of such a conference taking place; there is no reference to it in either the Gerold or Pibam files; and no record exists of who lived where.

So that's a complete blank. Sorry! Do try me again, when occasion offers — the record can only improve!

Science interview was rewarding, but I fear it is clear that they will go with someone more in the mainstream. And I will sit with Penn / Isis / CHOC, and bide my time.

On CHOC, I enclose a copy of a recent letter to Evers at Dreyfus, where I will be glad of any help you can give.

(Now the Dreyfus job is one that would interest me, as it cries out for imagination in the deployment of limited funds). Will you be at AAAS at all, it would give me great pleasure if you could attend the Jastrow lecture (27 Mar).
As ever Arnold
